Amendments to the claims

Amendments to the claims are reflected in the following listing of claims, which replaces all prior versions or listings of the claims:

- 1. (Currently amended) An isolated nucleic acid molecule which encodes a polypeptide, wherein the amino acid sequence of said polypeptide consists of a sequence that has is a fragment of the polypeptide sequence represented in SEQ ID NO: 8 having at least [[85%]] 95% sequence identity with residues 128-224 of the amino acid sequence presented in SEQ ID NO: 8, and wherein the polypeptide inhibits the apoptotic activity of p53.
- 2. (Currently amended) The nucleic acid molecule according to Claim 1, wherein said <u>nucleic acid</u> molecule encodes a <u>fragment consisting of amino acid residues</u> 128-224 of the sequence represented in SEQ ID NO: 8.
- 3. (Previously presented) The nucleic acid molecule according to Claim 2, wherein said molecule is isolated from a human.
 - 4.-7. (Canceled)
- 8. (Previously presented) The nucleic acid molecule according to Claim 1, wherein said nucleic acid molecule is a cDNA or genomic DNA.
 - 9.-10. (Canceled)
- 11. (Currently amended) A vector comprising the nucleic acid <u>molecule</u> according to Claim 1.

- 12. (Previously presented) The vector according to Claim 11, wherein said vector is an expression vector.
- 13. (Previously presented) A cell transformed or transfected with the nucleic acid molecule according to Claim 1.
- 14. (Currently amended) A pharmaceutical composition comprising the nucleic acid <u>molecule</u> according to Claim 1.

15. – 56. (Canceled)

- 57. (Previously presented) The isolated nucleic acid molecule of claim 1, wherein the polypeptide has at least 97% sequence identity with amino acid residues 128-224 of the amino acid sequence presented in SEQ ID NO: 8.
- 58. (Previously presented) The isolated nucleic acid molecule of claim 1, wherein the polypeptide has at least 99% sequence identity with amino acid residues 128-224 of the amino acid sequence presented in SEQ ID NO: 8.
- 59. (Previously presented) An isolated nucleic acid molecule which encodes a polypeptide, wherein the amino acid sequence of the polypeptide has at least 95% sequence identity with residues 128-224 of the amino acid sequence presented in SEQ ID NO: 8.
- 60. (Previously presented) An isolated nucleic acid molecule which encodes a polypeptide, wherein the amino acid sequence of the polypeptide consists of residues 128-224 of the amino acid sequence presented in SEQ ID NO: 8.
